

HILTON WELLHEAD PRODUCTS PVT LTD

A HILTON METAL FORGING LTD GROUP COMPANY

- ***Manufacturer and exporter of wellhead equipment for oil & gas industry***
- ***Pressure control equipment for onshore and offshore oil and gas drilling.***

‘ONE STOP SOLUTION FOR OIL & GAS INDUSTRY’

ABOUT HILTON WELLHEAD

**HILTON
WELLHEAD**
PRODUCTS PVT LTD

Hilton Wellhead Products Pvt Ltd., a group company of Hilton Metal Forging Ltd., offers specialized products for the OIL & GAS industry.

Our head office is in Mumbai and manufacturing plant is in Wada, District Palghar Thane, just 68km (approx.) from Mumbai Airport.

Our products meet stringent quality standards as stipulated by API, ASME, IS and other globally accepted codes

The interchangeability of this product line allows Hilton Wellhead to supply wellhead equipment to customers that may have used products from other brands

OIL FIELD COMPONENTS

We manufacture and machine Valve Bodies, Bonnets, Tees, Elbows, Spares and various Wellhead Components.

GATE VALVES

We offer a complete line of FLS and FLS-R gate valves and FLS gate valve parts that are built to withstand harsh pressures, corrosion and erosion.

We offer gate valves in various models & sizes from 1 -13/16" to 9" and 2,000 psi through 15,000 psi pressure ratings, and in various trims and body materials to meet clients' specifications.

All the models are built and tested to comply with appendix F – performance verification procedure level PR2

CHOKE VALVES

We design & manufacture manual chokes in accordance with API 6A. Standard sizes available 3 1/8", 3-1/16" and 4-1/16" with working pressures of 5000 psi, 10000 psi and 15000 psi having orifice size 2". Other sizes available upon request. All parts are suitable for H₂S service and temperature rating L to X (-50 °F to 350 °F).

Choke types: Adjustable chokes & positive chokes

Body design: Angle type

End connections: Flanged or threaded ends

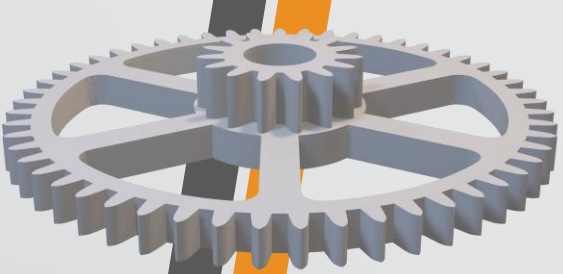

MANIFOLD UNITS

We work with you to ensure that the design is perfectly suited to your application. Choke and kill manifold is designed in line with API standard 6A & 16C Manifolds are available in working pressures up to 15,000 psi and are rated for Standard as well as sour gas services.

**Choke & Kill manifold | Debris catcher manifold | Well test diverter manifolds |
Frac manifolds and trees | Christmas trees**

MUD GATE VALVES

Our Mud Gate Valves have a unique bi-directional sealing design which provides a thru-conduit, upstream and downstream seal which creates a pressure-energized balance between the slab gate and seat assemblies when subjected to line pressure.

We provide Mud gate valves upto 7,500-psi which is available in sizes 2 to 6 inches [50-150 mm] with butt-weld end or flanged end connections. Engineered specifically for high-pressure requirements of deep well drilling.

**Standpipe mud manifolds | Pipelines and mud pump manifolds | High-pressure drilling mud service
Frac service | Water, oil, gas lines | Wellheads | Abrasive drilling mud | Sour gas and crude oil**

PRESSURE CONTROL EQUIPMENT

Our range of high pressure control equipment include: **Drilling Spools** (designed and manufactured in accordance with API product specification API 16A.) **Frachheads**, **BOP Test Stumps**, **Spacer Spools** (in all sizes and pressure ratings, compliant to API 6A & 16A), **Adapter Spools**, **Adapter Flanges**

CHICKSAN LOOPS & SWIVELS

Our Chicksan loops can handle a full range of fluids to cold working pressures up to 15,000 psi and come in sizes and configurations to meet any need. Hose loops for sour gas service are available at cold working pressures up to 10,000 psi.

Our hose loops perform well in a variety of high pressure well service applications including discharge lines, water lines, cementing and circulating lines, well test lines and temporary flow lines.

HAMMER UNIONS & PUP JOINTS

Forged Hammer Unions: Manufactured from steel forgings using materials appropriate to specific pressure ratings.

End Connections | Standard Service | Sour Service | Low Temperature Service | Interchangeability | Traceability

Pup Joints: Integral hammer lug union-end connections. This enables faster, easier make-up and break-out of temporary flow lines.

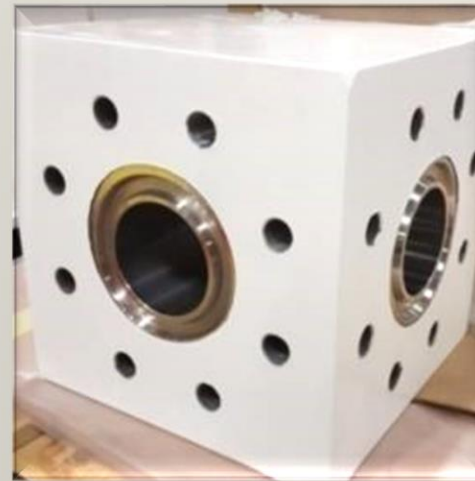

API FLANGES, TEES, CROSS, X-OVERS

We manufacture studed crosses & tees for various sizes and pressure ratings in accordance with API product specification.

Our designed Flanged and studed Crosses and Tees are in accordance to the design requirements and face to centerline requirements of API Spec 6A.

We also manufacture and develop these products as per customer requirements in terms of bore sizes, end face connections, Over all lengths and weld neck lengths.

OUR USP : UNMATCHED QUALITY

Hilton Wellhead has kept quality in its utmost priority. We strongly believe in providing total customer satisfaction through excellence in product and process development, building quality into the process, proactive approach to quality issues, quick response to customer, cutting-edge technology and price competitiveness.

Our products are designed & manufactured to withstand rigid tough operating conditions. They are made in compliance with renowned global industry standards be it API, ASME, ISO, NACE.

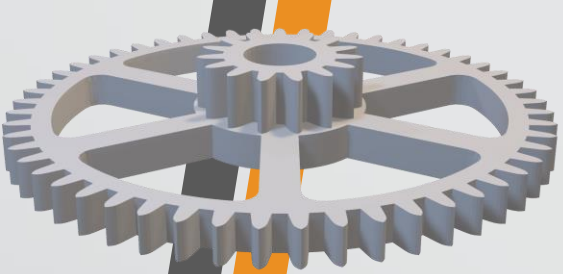

OUR USP : WELDING CAPABILITIES

Hilton Wellhead has an inhouse welding shop with latest technology machinery with the capability to weld high pressure, high temperature critical joints & overlay depositions for critical materials. Our 6G certified welding team has expertise to perform & execute challenging jobs, be it inhouse or onsite requirement for customers.

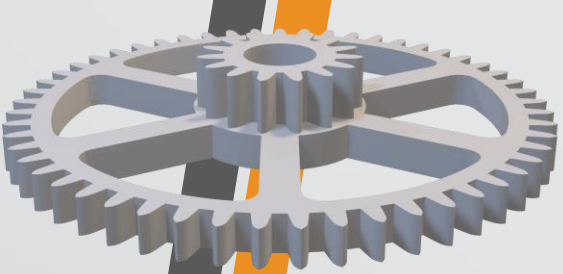

OUR USP : PACKAGING & LOGISTICS

Hilton Wellhead has a dedicated team to design secured packaging as per the equipment dimensions & weights to make it easier to load and unload to ensure safe delivery. We offer door-to-door delivery, in transit accident insurance and complete material logistics support to ensure timebound, safe and hassle-free delivery of shipment.

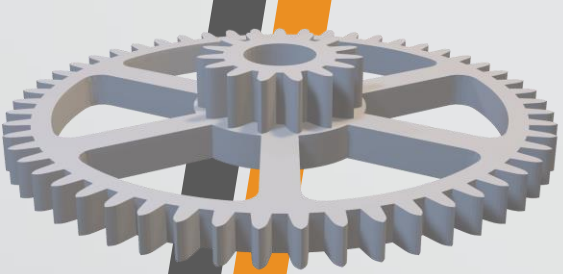

AFTER MARKET SALES SUPPORT

We understand that our commitment to you continues well after you have purchased our products. Hilton Wellhead 's 'Aftermarket Services' has three convenient locations including Mumbai, Vadodara & Barmer to cater to the major oil field belts in India. We undertake repair and overhaul of equipment to support your operations and reduce downtime. With substantial inventory and spare parts in stock, we offer repair, recertification and rebranding of your equipment to help you succeed.

THANK YOU

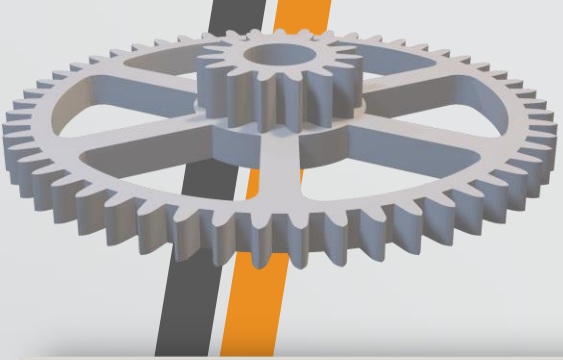

We assure you of our best services and look forward to your support and business opportunity.

THANK YOU.
